SAMPLING PROCEDURE

Sampling shall be conducted during loading at the loading port following internationally recognized standards for sampling. Incremental samples shall be taken systematically and combined into representative composite samples. Sampling and sealing procedures shall be supervised and certified by the independent inspection company.

QUALITY DETERMINATION

All quality determinations shall be performed by an internationally recognized inspection company such as SGS, Intertek or Bureau Veritas at the loading port. The inspection certificate issued at the loading port shall be final and binding for both Parties.

SAMPLE RETENTION

One representative sealed sample shall be retained by the inspection company for ninety (90) days for reference in case of dispute.

MOISTURE DETERMINATION

Moisture content shall be determined at the loading port based on laboratory analysis of representative composite samples. The moisture value determined at the loading port shall be the contractual moisture value for the cargo. Any determination at the discharge port shall be for reference only and shall not affect commercial settlement.

QUANTITY AND WEIGHT DETERMINATION

The quantity of the cargo shall be determined at the loading port by draft survey conducted by an independent inspection company such as SGS, Intertek or Bureau Veritas.

The draft survey certificate issued at the loading port shall determine the official shipped quantity and shall be final and binding for both Parties.

The quantity stated in the Bill of Lading and confirmed by the draft survey certificate shall be the contractual quantity for invoicing and settlement purposes.
